Nedo PRIMUS 2

Fully automatic rotating lasers Made in Germany

**NEDO PRIMUS 2
SERIES**

Nedo **PRIMUS 2**, the series of fully automatic rotating lasers for professionals. Ideal for levelling, aligning and grade control. Reliable and rugged for tough construction jobs. Uncompromising quality for professionals. All **PRIMUS 2** models can be supplied with laser class 3R or laser class 2 with Bright Beam technology™.

The **PRIMUS 2** series sets a new standard for fully automatic rotating lasers.

High technology made in Germany.

The Fully Automatic Rotating Lasers Made in Germany

3-year warranty for all
PRIMUS 2 models

PRIMUS 2 - The Standard for Fully Automatic Rotating Lasers

Setting Standards for Precision and Reliability

The rotating lasers of the **PRIMUS 2** series remain extraordinarily precise whatever the site conditions – in continuous rainfall, severe cold or blazing heat. Whether horizontal, vertical or at a gradient.

Always reliable, whenever and wherever they are used.

The **PRIMUS 2** casing is protected against jet water and dust in line with IP 66. After use, the **PRIMUS 2** can even be sprayed down with water to clean it.

The Standard for Ruggedness

Thanks to their innovative shock protection system, the rotating lasers of the **PRIMUS 2** series can easily withstand a fall from a height of 1 m. The thick lining and rotor protection provide additional safety.

Setting Standards for Visibility

All **PRIMUS 2** rotating lasers are fitted with high-quality laser diodes with 635 nm wavelength. The customer can choose between high-power laser diodes in laser class 3R or laser diodes in laser class 2 featuring Bright Beam Technology™ thus ensuring optimum visibility of the laser beam even under unfavourable light conditions.

The Standard for Long Life

High-power rechargeable NiMH batteries with Eneloop™ technology ensure a long operating life of more than 100 hours, with minimal self-discharging. The intelligent power compartment permits quick changing between battery and rechargeable battery operation.

Setting Standards for Easy Operation

Are you fed up with difficult-to-handle devices?

All **PRIMUS 2** lasers feature in addition to the standard 5/8" mounting thread the Quick-Fix rapid locking system which allows the laser device to be fixed in just a few seconds to any tripod and just as quickly detached. Just throw the lever for fixing or detaching.

That's all!

Laser receiver ACCEPTOR MAXX with mm display, extra large detector field and Heavy-Duty rod clamp

The ingeniously designed display can be seen from both the front and the side. The LEDs are extremely bright, allowing them to be read from a great distance.

Scope of delivery:
 Rotating laser **PRIMUS 2 H**, laser receiver **ACCEPTOR MAXX with mm display** and Heavy-Duty rod clamp, rechargeable batteries and charger, Quick-Fix rapid locking system and transport case
 Ref.-No. 472 018

Features:

- Fully automatic rotating laser for horizontal applications
- Robust, motor-powered levelling
- Automatic level control stops the laser if it receives a heavy jolt. In this way, height errors are avoided.
- High-power laser diode, laser class 3R, for highly visible laser beam and easy work at the close range
- Alternatively available with laser class 2 with Bright Beam Technology™
- Large, clear display showing rotation speed, battery level, etc.
- Rotor protection made of break-proof glass
- Laser receiver **ACCEPTOR MAXX** with Heavy-Duty rod clamp made of diecast aluminium
- Extremely easy to use
- Highly accurate even under toughest conditions
- Available on request with a rotation speed of 900 rpm perfect for machine control applications

Ideal for use on every construction site. Perfect for levelling in applications such as:

- Rough and fine grading
- Depth control for excavations
- Casting concrete
- Bricklaying
- Landscaping
- Machine control

Optional accessory **"Outdoor package"**:

- Aluminium tripod, (Ref.-No. 200 225) working range 0.91 m to 1.69 m
- Flexi Rod with universal adapter and carrying bag

Ideal for interior applications. Perfect for levelling and aligning jobs, especially in the following areas:

- Depth control for excavations
- Concrete casting
- Concrete formwork
- Use of batter boards
- Bricklaying
- Laying screed
- Drywall installation
- Ceiling construction
- Facade construction

Nedo Facade Construction Adapters

The Facade Construction Adapters are fastened to the wall and horizontally aligned with the aid of integrated bubbles. Thanks to the mm graduations provided on the traverses, rotating lasers and laser receivers can be conveniently positioned at the required distance from the wall. The new Facade Construction Adapters have been optimally matched to the fully automatic PRIMUS 2 HVA and PRIMUS 2 HVA2N rotating lasers with AutoAlign function and to the COMMANDER 2 laser receiver, and provide in combination with these instruments a professional and complete system for facade construction.

Facade Construction Adapter for PRIMUS 2 Rotating Lasers

Sturdy aluminium facade construction adapter. Sliding runner with tripod head and 5/8" connecting thread. Adjusting range approx. 450 mm. Three adjusting screws allow exact alignment of the facade construction adapter.

Ref.-No. 461 046

Facade Construction Adapter for COMMANDER 2 Laser Receivers

Sturdy aluminium facade construction adapter. Sliding runner for accommodating the COMMANDER 2 laser receiver. Adjusting range approx. 490 mm. Three adjusting screws allow exact alignment of the facade construction adapter.

Ref.-No. 461 056

Mini-Flexi Rod for Facade Construction

The mini-flexi rod allows distances in facade construction to be measured quickly and easily. Measurement range: 65 mm to 280 mm

Nedo Batter Board Holder

On modern construction sites the batter board is increasingly being supplanted by a rotating laser. The laser is, in vertical operation, placed on a batter board holder fastened to the batter board by a clamping screw. The batter board holder is provided with a turntable allowing rough alignment of the rotating laser.

The laser receiver with the receiver holder is clamped on the opposite side of the batter board. Thanks to the AutoAlign function, the laser plane automatically aligns with the laser receiver in the case of the PRIMUS 2 HVA and PRIMUS 2 HVA2N models. Furthermore, the laser plane is automatically monitored and if necessary corrected by the AutoAlign function.

ACCEPTOR MAXX

Nedo **ACCEPTOR MAXX** is a new digital laser receiver with a mm display and an extra-large detector field. The robust housing and virtually indestructible Nedo heavy-duty rod clamp make the new **ACCEPTOR MAXX** perfect for use under harsh conditions.

Large illuminated digital LC displays on the front and back show the deviation of the zero line of the **ACCEPTOR MAXX** from the plane of the rotation laser. The easy-to-read displays allow you to read off height differences directly in mm, without calculation.

In addition, extremely bright LEDs show the position of the laser receiver in relation to the laser plane. The ingeniously designed housing allows the LEDs to be seen from the front and the side, even from a great distance. Furthermore, an acoustic signal indicates the position of the laser receiver.

ACCEPTOR MAXX

MAXXimum detector field

- Detector field with 120 mm length

MAXXimum performance

- Double LED display in front and side
- Illuminated displays

MAXXimum working range

- Working diameter 900 m

MAXXimum precision

- Digital mm display up to ± 40 mm

Features:

- Robust laser receiver for all rotating lasers with a red laser beam
- Extra-large 120 mm detector field
- Large illuminated LC displays on the front and back
- Readout of height difference in mm
- Size of directional arrows is proportional to difference in height
- Bright LED display, visible the front and side
- 4 accuracy settings: ± 1 mm, ± 2 mm, ± 4 mm and ± 8 mm
- Energy-saving mode, display illumination can be switched off
- Battery status shown in display
- Switchable acoustic signal
- Bubble for easy alignment
- Automatic shut-off after 15 min.
- Nedo heavy-duty rod clamp and batteries supplied as standard

Nedo Laser Receiver for Rotating Lasers

Nedo COMMANDER 2 with mm display

Extremely robust laser receiver with integrated radio remote control for rotating lasers of the PRIMUS 2 series.

With the mm display, height differences during levelling can be read off directly – without calculation.

Features:

- Extremely robust laser receiver for all rotating lasers with red laser beam
- mm-display
- Heavy-Duty rod clamp made of diecast aluminium
- Large detector field with 70 mm length
- Large LC display on front and back
- Bright LED display
- Adjustable volume
- Automatic switch-off
- Display of remaining battery power
- Easy to handle
